PROFILE SUMMARY

Motivated and detail-oriented MCA graduate with strong foundation in programming, data structures, and software development. Seeking an entry-level Developer role to apply technical skills, learn new technologies, and contribute to real-world software solutions.

TECHNICAL SKILLS

Programming Language: .NET CORE, Java, Python

Web Technologies: HTML, CSS, JavaScript, React

Database: MSSQL

Tools: Visual Studio, Eclipse, Bootstrap, Docker,

Languages: English, Tamil, French, Hindi

EDUCATION

Master of Computer Applications (MCA)

SRM Institute of Science and Technology- Chennai, Tamil Nadu

Year of Graduation: 2026 | CGPA: **6.13**

Bachelor's Degree (B.Sc Computer science)

Dr. G. R. Damodaran college of science- Coimbatore, Tamil Nadu

Year of Graduation: 2024 | CGPA: **6.34**

ACADEMIC ACHEIVEMENTS

- Full-stack development specializing in .NET Core, Green Technologies, April 2025
- Google Cybersecurity Professional Certificate, Grow With Google: Identity India, September 2024

- Blockchain Developer Training, Simplilearn, October 2023
- Java Full Stack, Wipro TalentNext, September 2023
- Business English Certificate Preliminary, Cambridge University Press & Assessment, October 2021

ACADEMIC PROJECTS

DECENTRALIZED BLOCKCHAIN MONEY TRANSACTION SYSTEM

July 2025 - September 2025

Tools: Blockchain, Python, Smart Contracts

Developed a secure and efficient peer-to-peer transaction system using blockchain, eliminating intermediaries.

Responsibilities:

- Eliminated the need for intermediaries like banks or payment processors using Ethereum blockchain.
- Enhanced privacy and security compared to traditional centralized transactions.
- Provided cryptographic security and immutability, increasing trust and reducing fraud risk.

SECURED SHARING OF EHRs USING BLOCKCHAIN

December 2022- June 2023

Tools: React, Blockchain, Smart Contracts

Developed a blockchain-based prototype to secure and enhance the privacy of Electronic Health Records (EHRs), giving patients control over their health data.

Responsibilities:

- Developed a blockchain-based EHR system prototype to securely store patient health records, enhancing privacy and security.
- Empowered patients with control over their health data, enabling secure sharing with authorized healthcare providers.
- Addressed traditional EHR challenges like data breaches and lack of interoperability, showcasing the benefits of blockchain in healthcare. Developed the front-end using React, ensuring a responsive design that works seamlessly across desktops, tablets, and mobile devices.
